Hi Cathleen,

Our records show 10-balances, 4 centrifuges & 8 microscopes in Amherst. We can perform calibration/certifications for these units @ \$1825.00. If you have other items or increased quantities of those mentioned, please let me know and I will requote.

Hi Ed-we are looking to get a quote for a visit to the Amherst lab-we would like you to do all of the equipment, including the balances (which are normally done in June) to get everything on the same cycle moving forward and only requiring one visit.

With the quote then I can get the PO-they are due to be checked in December-let me know if you need a list on our end-thank you
Cathleen
